About Me

A Computer Science graduated in a BSc in Computer Science. eficient in Python , Flask . Passionate about cybersecurity and actively researching in the field. Enthusiastic open-source contributor, eager to collaborate and learn from others. Seeking opportunities in software development or cybersecurity to apply my skills and contribute to innovative projects.

Skills

- Efficient in Python
- Experience in Intergrating APIs
- Familiarity with GIT and GITHUB
- Report writing and Documentation
- OWASP TOP 10 knowledge
- BASH Scripting

Tools & OS

- Kali Linux
- BurpSuite
- Metasploit & MobSf
- Virtual Box
- Nessus
- Other Pentesting tools

Projects

Subdomain Enumerator
Automated tool for discovering and validating subdomains using assetfinder and httprobe, with duplicate removal and statistical reporting for cybersecurity reconnaissance.

StackOverflow Error Parser
Python script that captures runtime errors, searches Stack Overflow, and opens top solutions in a browser, streamlining debugging for developers.

Web Scraping for Cybersecurity Research
Developed a Python web scraper with BeautifulSoup to extract server details from websites, saving results to a report file for quick infrastructure insights.

Experience

1 month intership in Cybersecurity from NOVAVI pvt ltd Ernakulam (january 1 - 31)

- experience in testing web applications
- experience in testing Android application

Extracurricular Activities

Debian Pakaging , actively studying and gaining proficiency in creating Debian package

Community Events,activitly attending various tech and community events,recently attended google cloud community day program

Bug Bounty,activitly attending various tech and community events,recently attended google cloud community day program

Education & Certifications

Cybersecurity And Networking
Synnefo Solutions(May - December)
Ernakulam 2023

Bsc Computer Science Graduate
MG University(2020-23)

Additional skills

- Web Development in Flask Django
- good Basics C & C++
- Data Structures & Algorithm
- installing and managing windows & various Linux distros
- familiar with PHP
